solutions in radiology*

Medisoft East Africa Limited

OUR SOLUTIONS

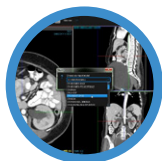

PACS

- Long term storage of images and reports digitally.
- May not need to buy bulky expensive films.
- Save on physical space.
- Instant access to images and reports by clinicians.
- Advanced image processing software.
- Supports HL7 and DICOM Modality Worklist.

Teleradiology

- Transmits images from one location to another securely over the internet for reporting or second opinion.
- Feature-rich dicom viewer with template-based reporting module for quick reporting.
- Free initial connection
- Pay per study model.

Voice Recognition

- Removes cumbersome manual report typing.
- Incorporates customizable report templates.
- Massive reduction in report turn around time.

Paper Printing

- Near diagnostic quality images printed and presented in appealing magazine like booklet.
- Works for CT, MRI, CR and ultrasound images

Hardware

Medisoft East Africa can supply the hardware needed for above solutions e.g. workstations and monitors. Alternatively specifications can be provided and the client procures the same.
